

MXM600

Frontline safety,
today and tomorrow

The MXM600 takes on the challenges of the front line, keeping your teams safe while they deal with the safety of others. It has been designed to provide reliable in-vehicle TETRA coverage for voice and data communications, as well as extend the coverage of TETRA portable radios via its gateway and repeater capability.

Clarity of voice communication is critical in order to get vital messages across. Noise suppression technology, trained through Artificial Intelligence (AI) machine-learning, is integrated in the MXM600 to suppress background noise and improve clarity of calls — so users can hear and be heard, even in noisy conditions.

We designed the MXM600 to be easy to install and automated some of the configuration work needed when setting up a mobile radio. The MXM600 is highly flexible when it comes to installation options: it can support two control heads from one transceiver, and also has the ability to control two transceivers from one control head. Whether you are looking to install the radio in a car, fire engine, van, ambulance, train, boat or on a motorcycle — there are installation options for you.

The MXM600 is a mobile radio that gives your frontline users the confidence to support their community. Ready to respond to sudden changes in the field and future changes in technology, it helps equip your front line to efficiently and effectively get the job done.

Key attributes

- Loud and clear audio with AI-trained noise suppression technology
- Supports GPS, Beidou, Galileo and GLONASS
- Bluetooth® 5.3 with up to 90 m range
- Hardware ready for High Definition (HD) voice
- Wideband 350 - 470 MHz or 806 - 870 MHz
- Wi-Fi 2.4 GHz and 5 GHz
- Automatic control head detection
- Automatic control head software updates
- Wi-Fi Over-The-Air Programming and firmware updates
- Compatible with all MTM5000 audio accessories and control heads
- Variety of transceiver models to support different needs
- Choice of 3 remote control heads
- Deeper radio interaction via M-Radio Control app on a Bluetooth-paired Android smartphone or tablet

GENERAL SPECIFICATIONS

DIMENSIONS (H, D, W) AND WEIGHT

Single remote
(transceiver and expansion head)

45 x 172 x 186 mm, 1355 g

Dual remote
(transceiver and expansion head)

45 x 172 x 194 mm, 1415 g

Databox
(transceiver and expansion head)

45 x 172 x 192 mm, 1450 g

Dash/desk mount
(transceiver and control head)

60 x 188 x 200 mm, 1530 g

Dash/desk mount transceiver

45 x 172 x 167 mm

Dash/desk mount control head

60 x 188 x 31 mm

IP54 Remote Ethernet control head
(IP54 RECH)

60 x 188 x 39 mm, 332 g

IP67 Remote Ethernet control head
(IP67 RECH)

60 x 188 x 39 mm, 338 g

Telephone style control head
(TSCH) (excluding cable)

220 x 65 x 75 mm, 450 g

ELECTRICAL

Electrical voltage range 10.8 to 15.6 V DC

Electrical current consumption

- At 10W: Idle 0.5 A, Rx¹ 1.1 A, Tx 1.1 A
Peak consumption is 3.5 A for Tx 1.1A for Rx with 15.6W speaker
- At 3W: Idle 0.5 A, Rx¹ 1.1 A, Tx 0.75 A
Peak consumption is 1.45 A for Rx¹
- Tx-Multi Slot PD (6 slots) at 10 W: 2.4 A (3.6 A peak)
- Dash/desk control head adds 0.16 A
- IP67 or IP54 RECH adds 0.3 A
- TSCH adds 0.3 A
- USB host adds 0.25 A
- Wi-Fi adds 0.13 A
- Bluetooth adds 0.04 A

AUDIO

Audio output power at maximum volume (depending on external speaker selected)

External: 7.5 W / 13 W / 15 W

CONNECTORS AND PORTS

	26-pin connector
	Power connector
Common across the back of all models of transceiver	GNSS antenna connector
	Combined Bluetooth and Wi-Fi antenna connector
	TETRA antenna connector
	TETRA SIM card slot
Single remote model	1 x RJ50 control head connector
	2 x RJ50 control head connector
Dual remote model	RJ50 External SIM / RJ45 Ethernet connector
	RS232 (9-pin SubD)
	1 x RJ50 control head connector
Databox model	RS232 (9-pin SubD)
	25-pin SubD front connector
Dash/desk mount model	GCAI MMP
IP54 RECH and IP67 RECH	25-pin SubD rear connector
	GCAI MMP
TSCH	10-pin accessory connector
	Micro USB port

CONNECTORS AND PORTS FUNCTIONALITY

RS232	Enables PC applications to run simultaneously: Packet Data, AT Commands and SDS
GCAI MMP	Motorola Solutions rugged accessory connector for connection of accessories and programming
USB via 26-pin connector accessory	<ul style="list-style-type: none"> • USB 2.0 supports rapid programming and Peripheral Equipment Interface (PEI) (that enables PC applications to run simultaneously: Packet Data, AT Commands and SDS) • USB On-The-Go (host and secondary) capability for PEI applications • USB 1.1 support (host mode) to manage USB secondary devices (e.g. SIM card reader)
General Purpose Input / Output (GPIO)	<ul style="list-style-type: none"> • 4 digital GPIOs (2 on rear 25-pin connector of IP54 RECH and IP67 RECH, 2 on rear 26-pin connector of transceiver) • 1 analogue GPIO (4 levels on rear 25-pin connector of IP54 RECH and IP67 RECH)

¹ Based on 15.6W external speaker

TETRA SERVICES

RF

Frequency bands	350 - 470 MHz or 806 - 870 MHz
Transmitter RF power	10 W (class 2) and 3 W (class 3)
Adaptive RF power control	Yes: starting at 15 dBm; finishing at 40 dBm
Receiver class	A and B
Receiver static sensitivity (ETSI 300-392-2)	350 - 470 MHz: -116 dBm minimum, -118 dBm typical 806 - 870 MHz: -114 dBm minimum, -116 dBm typical
Receiver dynamic sensitivity (ETSI 300-392-2)	350 - 470 MHz: -107 dBm minimum, -109 dBm typical 806 - 870 MHz: -105 dBm minimum, -107 dBm typical

VOICE

Full duplex	TMO: private, PABX, PSTN, MS-ISDN, emergency
Half duplex	TMO: private, group, emergency
	DMO: private, group, emergency
Emergency call (user customisable)	Tactical: emergency group call to attached talkgroup
	Non-tactical: emergency group call to dedicated talkgroup
	Individual: emergency call to pre-defined party (half/full duplex)
	Hot mic: configurable timers for automatic open mic (talk without PTT)
	Smart emergency: TMO to DMO and DMO to TMO automatic switching options
	Location: location (GNSS) is sent with emergency
	Target address: sent to individual or group address (selected or dedicated)
DGNA	Up to 10,000 groups
Other voice functions	Phonebook: 1000 persons, 6 numbers per each, 2000 maximum entry
	<ul style="list-style-type: none"> Scanning: 40 lists of 20 talkgroups, monitoring 20 groups at the same time (selected talkgroup and passive monitoring) Announcement talkgroup: 1 primary talkgroup that can monitor other talkgroups

DATA

Short Data	Status: <ul style="list-style-type: none"> • 400 entries, send via One-Touch Button (OTB) or via menu • TMO and DMO
	SDS: <ul style="list-style-type: none"> • Concatenation up to 1000 characters • TMO and DMO
	Target address: sent to individual or group address (selected or dedicated)
Packet Data	SDS messages can be sent and received during a voice call
	Call out (simple, full, E2EE)
PEI (Peripheral Equipment Interface)	Multi-slot Packet Data: data transmission with up to 4 slots supporting up to 28.8 kbit/s in total
	<ul style="list-style-type: none"> • TNP1: Simultaneous operation of Packet Data and Short Data Services over a common Peripheral Equipment Interface (PEI) • AT Commands: full set of ETSI and Enhanced AT Commands • AT multiplexer: 4 virtual physical port (simultaneous PD, SDS, AT Commands and Air Tracer Sessions)
WAP	WAP 1.2.x and WAP 2.0 compatibility for UDP/IP stack

TETRA SERVICES (CONTINUED)

DMO / TMO GATEWAY SERVICES

DMO / TMO gateway mode	Group voice calls from DMO to TMO
	Group voice calls from TMO to DMO
	Emergency group call from DMO to TMO
	Emergency group call from TMO to DMO
	Call pre-emption (in either direction)
	SDS messaging through the gateway from DMO to TMO or TMO to DMO
	Configurable routing of SDS messages to console or PEI
Point to point calls and SDS messages whilst operating as a gateway	

DMO REPEATER SERVICES

DMO repeater mode	Repeats DMO voice calls on selected talkgroup
	Repeats SDS and Status messaging on selected talkgroup
	ETSI type 1A DMO repeater for channel efficient operation
	Transmission of Repeater Presence Signal
	Priority call, Emergency call (Preemptive Priority call)
	End-to-End Encryption (E2EE) DMO traffic
	Monitoring of and participation in calls whilst in Repeater mode
Configurable repeater power levels	

CONNECTIVITY

WI-FI

IEEE standards supported	802.11 a, b, g, n, ac
Wi-Fi bands	2.4 GHz and 5 GHz
Authentication and encryption	<ul style="list-style-type: none"> • WPA • WPA2 • WPA2 Enterprise (EAP-TLS)
Security	TLS 1.2 (OTAP application)

BLUETOOTH

Bluetooth versions supported	Bluetooth 5.3, 5.2, 5.1, 5.0, 4.2, 4.1, 4.0, and 2.1 + EDR
Bluetooth range	<p>Bluetooth power: Class 1</p> <p>Line of sight range is up to 90 m (accessory dependent)</p>
Bluetooth security	<ul style="list-style-type: none"> • With Secure Connections (used in security mode 4, level 4 as recommended by NIST²) • Supports Advanced Encryption Standard (AES) algorithm, with 128 bit key length • Also uses an algorithm for Bluetooth key generation and key authentication
Bluetooth audio profiles	<ul style="list-style-type: none"> • Headset Profile (HSP) • Serial Port Profile (SPP) • Generic Access Profile (GAP) • Generic Attributes Profile (GATT)

SECURITY

Air Interface Encryption Authentication	Infrastructure initiated and made mutual by terminal
Air Interface Encryption algorithm options	<ul style="list-style-type: none"> • TEA1 • TEA2 • TEA3 <p>(Hardware ready for TEA5, TEA6, TEA7 and dual encryption)</p>
Air Interface Encryption Protocols - security classes	<ul style="list-style-type: none"> • Class 1 (Clear) • Class 2 (SCK) • Class 3 (DCK/CCK, OTAR-CCK, OTAR-SCK) • Class 3G (GCK, OTAR-GCK)
End-to-End Encryption (E2EE) options	<ul style="list-style-type: none"> • AES128 or AES256 for voice and short data with OTAK supported through an optional Hardware Security Module (HSM) • Encrypted SDS messaging to the Short Data Router (SDR) via the Short Data Encryption Gateway (SDEG) • Internal TETRA SIM card: via integrated card slot • External SIM card reader connected through a rear accessory connector or a Dual Remote Transceiver's RJ50 SIM port
User access control	<p>PIN/PUK code access</p> <ul style="list-style-type: none"> • Selection for Radio User Assignment (RUA) / Radio User Identity (RUI) Operation • RUA / RUI allows a radio user to authenticate and have access to only those radio capabilities defined in pre-installed service profile. • Setup for forwarding of calls and SDS from permanent radio to the currently assigned radio. • Users who are logged on to a radio different from their permanent radio can still be reached (called, send SDS) at permanent radio number (P-ISSI). • RUA / RUI are not supported when E2EE is enabled. <p>Temporary disable (stun)</p>
Other security features	<p>Permanent disable (either ETSI standard or customer restorable)</p> <p>Packet data user authentication</p>

LOCATION SERVICES

SATELLITE / OUTDOOR NAVIGATION SERVICE

Constellations supported	GPS plus one of: Galileo, GLONASS, and BDS (BeiDou), Satellite-Based Augmentation Systems (SBAS) including QZSS
Antenna	External antenna, supports active antenna (5 V, 25 mA supply)
Simultaneous satellites	12
GNSS acquisition sensitivity	GPS: -145 dBm (guaranteed); -146 dBm (typical)
GNSS tracking sensitivity	<p>GPS: -163 dBm (guaranteed); -164 dBm (typical)</p> <p>BDS (BeiDou): -155 dBm (guaranteed); -156 dBm (typical)</p> <p>GLONASS: -157 dBm (guaranteed); -160 dBm (typical)</p> <p>Galileo: -155 dBm (guaranteed); -157 dBm (typical)</p>
Horizontal accuracy, 2D	1.2m (95% probable, -130 dBm, >15 SVs Galileo and GPS)
Protocols	<ul style="list-style-type: none"> • ETSI LIP (Short and Long) • Motorola Solutions LRRP
TTFF cold start	<60 sec (95% probable at -130 dBm)
TTFF hot start	<10 sec (95% probable at -130 dBm)

USER INTERFACES

Display	<ul style="list-style-type: none"> • IP54 RECH and IP67 RECH: 2.8" (43.2 x 57.6 mm), VGA - 640 x 480 pixel, 65K colours • TSCH: 2.0" (30.6 x 40.8 mm) TFT colour transfective display, 240 x 320 black pixels on white background, 65K colours 	Contacts management	Rapid search to find the contact easily
	Variable backlight, user configurable	Contacts	<ul style="list-style-type: none"> • Up to 1000 contacts • Up to 6 numbers per contact, maximum of 2000 numbers in total
	Font size: standard and zoom mode (90 pixels, 4.5 mm high) characters	Dialling methods	One-Touch Buttons (OTB), from the favourite folders, from the address book, from the recent calls list, direct dialling, from the embedded numbers in Short Data Service messages, speed dialling, talkgroup dialling by index
	Multiple display languages, user selectable	Call alert	Short alert tone (configurable) for group incoming calls
	Time display	Ring tones	Configurable via CPS / iTM
	Configurable screen saver: GIF image / text	Message manager	Distinct folders for each message type for flexible message management
	TSCH has rotating display: <ul style="list-style-type: none"> • When off-hook, portrait orientation • When on-hook, fixed portrait, clockwise rotation, counter clockwise rotation • When 2 x TSCHs, both have portrait orientation 	Text message list	<ul style="list-style-type: none"> • 100 short and 20 long messages (up to 1000 characters) for outbox • 100 short and 10 long messages (up to 1000 characters) for inbox
	Status LED	Status list	400 predefined messages assignable to One-Touch Buttons (OTB)
	Tones	Covert mode	Yes
	Controls	<ul style="list-style-type: none"> • Rotary, talkgroup (when pressed) and volume change dual function with lock option • 4-way navigation key, menu and soft keys • Emergency button with backlight • User configurable shortcuts to menus and common features using "One-Touch-Button" (OTB) feature 	Dual control head
International keypad options ³		Both displays are active with the following configurations: <ul style="list-style-type: none"> • 2 x IP54 RECH • 2 x IP67 RECH • 2 x TSCH • 1 x IP54 RECH and 1 x IP67 RECH 	
Back-lit character keypad with keypad lock option		Single display is active with either of these configurations: <ul style="list-style-type: none"> • IP54 RECH and TSCH • IP67 RECH and TSCH 	
3 programmable function keys (plus 12 programmable alphanumeric keys)	Multi radio control	<ul style="list-style-type: none"> • A single IP54 RECH or IP67 RECH or TSCH controls 2 transceivers • Display follows PTT 	
Text entry	Text entry	<ul style="list-style-type: none"> • Third party developed control head solution (physical or virtual) with the MXM600 transceiver • Motorola Solutions Remote Display Control (RDC) protocol is used for the solution (through Application Developer Program) • Optional use with IP54 RECH or IP67 RECH or TSCH in the dual control head configuration 	
Customisable menu	Automated control head detection ⁴	Yes	
Menu shortcuts	Auto control head software update ⁴	Yes	
Talkgroup management	Talkgroups		
User friendly, flexible, fast and efficient interface	<ul style="list-style-type: none"> • Dual layer folder structure (folder/subfolder) • TMO folders: up to 500, TMO talkgroups: up to 10000 • DMO folders: up to 128, DMO talkgroups: up to 2000 • 4000 TMO Entries (up to 2048 entries in one folder) 		
Favourite talkgroup folders	Favourite talkgroup folders	Up to 3 folders (128 groups each, 384 groups in total)	
Scan lists	Scan lists	40 lists of up to 20 groups	
Country/Network code list	Country/Network code list	100	

³ For the availability of specific language keypads please contact your local Motorola Solutions representative.

⁴ Requires both the transceiver and control head to have at least MR2024.1.

DEVICE MANAGEMENT SOLUTIONS

Customer Programming Software (CPS)	Requires CPS version 8.2 or newer
Integrated Terminal Management (iTM)	Requires iTM version 8.2 or newer
Over-The-Air Updates (via iTM)	<ul style="list-style-type: none"> • Supports Over-The-Air-Programming (OTAP) for configuration (codeplug) and Over-The-Air Updates (OTA Updates) for firmware via Wi-Fi.
Wired Updates (via CPS or iTM)	<ul style="list-style-type: none"> • Supports programming for configuration (codeplug) and updating radio firmware • Via a transceiver's 26-pin rear connector • Via a control head GCAI MMP connector

RECOMMENDED SERVICES

Services for TETRA radios	Visit motorolasolutions.com/mxm600 for more information
---------------------------	---

ENVIRONMENTAL SPECIFICATIONS

Operating temperature ⁵	-30 to +70 °C
Storage temperature	-40 to +85 °C
Humidity (condensation and high), temperature change, low and high temperature	ETSI 300 019-1-5 class 5.2
Shock (bumps and shock), drop (free fall, drop and topple) and vibration (random and sine)	ETSI 300 019-1-5 class 5M3
Dust and water Ingress Protection	<ul style="list-style-type: none"> • IP54 for all transceiver models (even with cables connected) • IP54 for IP54 RECH • IP55 for TSCH • IP67 for IP67 RECH

REGULATORY COMPLIANCE

Radio RED	2014/53/EU directive
Environmental	EN 50155 (IEC 60571 ED. 3.0)
Automotive	E-mark, ECE Regulation No.10 for Electrical/Electronic-Subassembly
Rail Certification EMC	EN 50121-3-2 (IEC 62236-3-2 Ed.2.0)

⁵ Full performance from -30 to +60 °C. Performance may be limited when operating at extreme temperatures.
